Summary

Prolific, MERN full-stack web developer with a passion for beating former "best-yets," Efficient and flexible in both F/E and B/E technologies with 2+ years of experience and beginner freelancer at Upwork and Fiverr. Developed app integration with REST / GraphQL APIs for payment processors, data fetching, authentication and other cloud based services. Managed, optimized, and updated Mongo DB and firebase databases with most efficient data structure and algorithms. Recently developed a QR attendance system and course registration, subscriptions with Razorpay.

Education

MP & EV English medium School (May 2017- May 2019)

➤ Scored 91.6 percentage in class 12th CBSE board and 97.1 percentile in JEE

IIITDMJ Jabalpur (June 2019 - present)

➤ Currently pursuing B-Tech in Electronics and Communication Engineering at IIITDM Jabalpur with CPI 8.1

Work Experience

Freelancer

➤ Freelancing at [Upwork](#) and [Fiverr](#)

Projects

Appointment JWT Auth API (December 2020)

➤ Recruiters of a company can schedule appointments & interviewees can fix appointments at their leisure. This API works with JWT and email verification.
➤ Data gets stored on Mongo DB with Bcrypt hashing and hosted on Heroku.

React Firebase Drive (June 2021)

➤ Drive clone where users can log in with their Google, Facebook, Github, or with custom email & password and upload files. Made with React, hosted on Firebase.

QR Attendance System (August 2021)

➤ Teacher creates a QR which expires within a minute and students need to scan that QR to mark their attendance. Made with React and hosted on Firebase.

Student Subscription (September 2021)

➤ Scholar subscription app where teachers can create plans and students can login to subscribe and, view classes. Made with React, Razorpay and, hosted on Firebase
