Hobbies

❖ Coding   ❖ Music

| Full Stack Developer | Freelancer |

❖ Summary

➢ Prolific, MERN full-stack web developer with a passion for beating former "best-yets," Efficient and flexible in both F/E and B/E technologies with 3 years of experience as both full-time and part-time intern. Recently worked as a full-time intern at Logicwind technologies where I worked under a specialized team under a web app to fixed bugs and added new functionality with 100% efficiency. Developed app integration with REST / GRAPHQL APIs for payment processors, data fetching, authentication and, other cloud-based services. Managed, optimized, updated Mongo DB and firebase databases with the most efficient data structure and algorithms. Developed a QR attendance system and course registration, subscriptions software with Razorpay.

❖ Education

➢ MP & EV English medium School   (May 2017 - May 2019)
- Scored 91.6 percentage in class 12th CBSE board and 97.1 percentile in JEE.

➢ IIITDMJ Jabalpur   (July 2019 - present)
- Currently pursuing B-Tech in Electronics and Communication Engineering at IIITDM Jabalpur with CPI 8.1

❖ Work Experience

➢ HIDS Technologies   (Oct 2021 – Dec 2021)
- Developed and delivered a MERN (React+ Node JS) stack multi-role based software within 3 months duration with 90% efficiency.
- Used Firebase hosting, authentication, storage, firestore, real-time database for user presence. Node JS as backend technology for processing requests & Bootstrap for UI.

➢ Logicwind Technologies   (Oct 2021 – Jan 2022)
- Worked under a experienced team as a full time intern to collaborate on a mobile and web based software. Learnt Next JS, some UI libraries like Ant Design and Kendo UI.
- Fixed some potential bugs and added new features with 100% efficiency and completed the work within given timeframe.

❖ Key Projects   (December 2020 - September 2021)

➢ Build a REST API where recruiters of a company can schedule appointments & interviewees can fix appointments at their leisure optimizing appointment method by 60% and saving more then 50% time. This API works with JWT and email verification. Data gets stored on Mongo DB with Bcrypt hashing and hosted on Heroku.(Appointment JWT Auth API)

➢ Created a drive clone where users can login Google, Facebook, accounts or with custom email & password and upload files. Made with React, Firebase. (React Firebase Drive)

➢ Developed a react application where admin can create a QR which expires within 60 seconds and 100's of users can scan QR to mark their attendance saving more than 98% of time. Made with React, and Firebase. (QR Attendance System)

➢ Increased productivity by 50% and helped 100+ students by integrating Razorpay with React by helping a tutor making a scholar subscription app which can create plans and users can login to subscribe and, view classes. Made with React, Razorpay, and Firebase. (Student Subscription)
❖ Skills

➢ Node JS	➢ React JS	➢ Netlify
➢ Express JS	➢ Bootstrap	➢ Heroku
➢ Mongo DB	➢ CSS & SASS	➢ Postman
➢ CI/CD	➢ Firebase	➢ Socket.io
➢ Next JS	➢ Redux	➢ GraphQL
